PROFESSIONAL SUMMARY

.NET Developer with professional experience developing backend applications and RESTful APIs using C#, ASP.NET Core, and SQL Server. Experienced in API development, database integration, and working with microservices-based applications and CI/CD workflows. Familiar with Microsoft Azure cloud services and application development practices, including authentication, authorization, exception handling, and maintainable backend design. Microsoft Azure Fundamentals (AZ-900) and AWS certified, with additional hands-on project experience building secure, database-driven applications using Entity Framework Core and React.

PROFESSIONAL EXPERIENCE

Project Engineer | Wipro | March 2025 – Present

- Contribute to enterprise application development and modernization using C#, .NET Core, and ASP.NET Core.
- Worked on migrating an existing website from .NET to .NET Core using C# as part of an application modernization project.
- Contributed to a full-stack resource management application supporting hiring and employee data management using ASP.NET Core, ReactJS, SQL Server, and Entity Framework Core.
- Worked with Microsoft Azure and Azure App Service in cloud-based application development, and Azure DevOps CI/CD pipelines in application build and deployment workflows.
- Developed and worked with RESTful APIs using ASP.NET Core Web API, including Swagger/OpenAPI documentation, API debugging, and error handling.
- Worked with authentication-related technologies, including JWT, and developed familiarity with API security concepts.
- Used SQL Server, Git, Postman, JavaScript, and jQuery in application development and API-related workflows.
- Used AI-assisted development tools such as ChatGPT and GitHub Copilot to support code understanding, debugging, problem-solving, and technical documentation, where applicable.

POJECTS

TenantForge — Multi-Tenant SaaS Governance Platform

Tech Stack: ASP.NET Core | Entity Framework Core | SQL Server | React

- Designed and developed a multi-tenant SaaS platform with tenant-level data isolation using ASP.NET Core.
- Implemented JWT authentication and role-based access control (RBAC) for Admin, Manager, and Employee roles.
- Built RESTful APIs with pagination, filtering, and standardized response handling.
- Added audit logging and global exception-handling middleware to support monitoring, security, and reliability.

Auction Website

Tech Stack: ASP.NET Core | Entity Framework Core | SQLite | React

- Developed a full-stack auction platform using ASP.NET Core, React, and SQLite.
- Implemented user authentication and a secure bidding workflow with real-time updates.
- Designed RESTful APIs for auctions, assets, and transaction management.
- Built a wallet management system for user balances, bids, and payments.

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript
Backend: ASP.NET Core, .NET Core, Web API, MVC, Entity Framework Core
API & Security: RESTful APIs, JWT authentication, role-based access control (RBAC), middleware, exception handling
Frontend: React, HTML, CSS, Bootstrap
Databases: SQL Server, SQLite
Tools: Visual Studio, Git, GitHub
Cloud: Microsoft Azure Fundamentals (AZ-900), AWS Certified Cloud Practitioner

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) | GitHub Copilot Certification | GitHub Foundations | Foundational C# with Microsoft | AWS Certified Cloud Practitioner

EDUCATION

B.Tech, Computer Science and Engineering — Chandigarh Group of Colleges, Landran | 2024 | CGPA: 8.02
